Iana Averianova

Full-Stack Developer — TypeScript · React · Node.js · PostgreSQL

+33672812564 | averyanusha@gmail.com | linkedin.com/in/iana-averianova | github.com/averyanusha

PROFILE

Full-Stack developer (TypeScript, Next.Js, React, Node.js and PostgreSQL) with production experience delivering web-application end-to-end - REST API development, third-party API integration, JWT authentication, PostgreSQL data modelling, deployment and maintenance. Seeking a full-stack developer role preferably remote.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, C (basics), Shell
- Front-end: Next.Js, React, React Context, mobile-first responsive design, Chart.js, Framer Motion
- Back-end: Node.js, Express, REST APIs, JWT authentication, data validation, LLM API integration
- Databases: PostgreSQL (modelling, queries, Node integration)
- Tools: Git / GitHub, production deployment and maintenance (Render), Redis, BullMQ, Figma, Claude
- AI integration: LLM API integration, structured output with schema validation (Zod), response caching and cost control

PROFESSIONAL EXPERIENCE

Full-Stack Developer — GS Euro Diffusion (freelance) Apr 2025 – Present

Designed and built the full website of an international copper wire supplier, for whom live copper pricing is central to the business.

- Designed, built, deployed and maintain the full production site: multi-page architecture, mobile-first responsive design
- Interactive 12-month copper price chart (Chart.js), historical rate lookup calendar, real-time currency conversion via external API
- Built the contact form with backend validation and email delivery; diagnosed and fixed a production SMTP block on the hosting platform
- Built a CMS admin dashboard with JWT authentication and PostgreSQL, enabling the client to manage site content autonomously

Full-Stack Developer — Iana Dev (self-employed) Oct 2024 – Present

- Design, build, deploy and maintain full-stack web applications (TypeScript, Next.Js, React, Node.js, Express, PostgreSQL)
- REST API development, third-party API integration, authentication and database management
- End-to-end client work: scoping requirements, proposing architecture, delivering to production and ongoing support - full management of the business

Career break — relocation & full-time parenting 2021 – Sep 2024

Relocated from the Czech Republic to France, reached C1 French, full-time parent, then retrained as a developer (École 42 Lyon piscine, self-directed study).

Administrative Assistant — HasTraffic, Prague Oct 2019 – Jan 2021

- Office and operations management for a 30+ person web-traffic company
- Daily coordination between the CEO and the company's US branch (English working language)

PROJECTS

Memory card game — full-stack application 2026

- JWT authentication, PostgreSQL, per-game score history with dynamically computed XP/rank system. AI-generated card themes via LLM API with schema-validated output and caching in database React, Node.js, Express. card-game.ianadev.com · github.com/averyanusha/memory-card-game

CV builder — front-end2025

- React application for building CVs with real-time preview - github.com/averyanusha/cv-application

EDUCATION

Piscine — École 42 Lyon Sep 2024

One-month intensive selection program: C, algorithms, shell, Git - peer-to-peer method, ~60h/week.

Bachelor's degree, Communication and Media Studies - Metropolitan University Prague2016 – 2019
